

initial LiSi™

A HIGHLY AESTHETIC VENEERING CERAMIC FOR LITHIUM DISILICATE SUBSTRUCTURES

.'GC.'

INTRODUCING *initial* LiSi

Restoration courtesy of Al Hodges CDT, DTG

THE NEWEST AND MOST HIGHLY AESTHETIC VENEERING CERAMIC FOR LITHIUM DISILICATE SUBSTRUCTURES

GC Initial LiSi is an amazing new layering ceramic for Lithium Disilicate substructures. For the first time ever, Initial LiSi offers the highest aesthetics, perfectly matched CTE, and is a more cost effective option for your most popular restorations.

GC Initial LiSi, is a new member of the popular ceramic line of Initial. This new ceramic is a specialized veneering ceramic designed for lithium disilicate frameworks. With these types of frameworks gaining popularity, GC now offers a material for highly aesthetic and durable restorations for long-term patient satisfaction.

Thanks to the exact cross-matched coefficients of thermal expansion (CTE), its low firing temperature, and high stability during multiple firings, GC Initial LiSi ensures you safe and predictable processing of lithium disilicate frameworks.

GC Initial LiSi can be used in the individual layering and in the cut-back technique following the proven Initial ceramic concept; one shade system; one layering technique. If you want to go even further, full anatomical frameworks can be enhanced using the GC Initial IQ Lustre Pastes NF. The simplicity and easy handling of the GC Initial LiSi powders assure a short learning curve offering quick, aesthetic and economical results.

Restorations courtesy of Mitch Hurst CDT, DTG

FEATURE & BENEFITS

FINALLY! A LAYERING CERAMIC FOR LITHIUM DISILICATE RESTORATIONS WITH AESTHETICS TECHNICIANS DEMAND

- Superior natural aesthetics that are specially designed and adapted to the light-dynamics of lithium disilicate frameworks
- Low firing temperature and exact cross-matched coefficients of thermal expansion with high stability, even after multiple firings
- Comprehensive shade and layering system
- Simple handling and short learning curve

Restorations courtesy of Joshua Polansky

ROBUST & **STABLE**

OPTIMIZED, STABLE AND NATURAL AESTHETICS

GC Initial LiSi is a Feldspar based ceramic with an optimized crystal structure. This results in more natural optical effects and a much higher stability offering superior natural aesthetics. Low firing temperature and exactly cross-matched coefficients of thermal expansion with high stability, even after multiple firings!

EXTREMELY THIN COPING

1ST FIRING

8TH FIRING

Restorations courtesy of Jim Redden, CDT, DTG

Restoration fired 8 times at 750c on a very thin lithium disilicate coping. No cracking. No drop in value!

Restorations courtesy of Al Hodges CDT, DTG

SET & CONTENTS

GC Initial LiSi Basic Set

Fulfils the need of the minimal layering technique on top of the LiSi frame.

- 6 main Vita[†]-shades
(all 16 Vita[†]-shades available as refills)
- 1 Bleach Shade
- Enamels & Translucent
- Modeling Liquid
- Printed Shade Guide
- Technique Guide

Lithium Disilicate Substructure

Restoration courtesy of Jim Redden CDT, DTG

GC Initial LiSi Advanced Set

Fulfils the need of the more elaborate aesthetic layering technique on top of the LiSi frame.

- Insides
- Fluo dentines
- Enamel opalescent
- Cervical translucent
- Modeling Liquid
- Printed Shade Guide

875869 GC Initial LiSi, Translucent Modifier, 20g, TM-01
875870 GC Initial LiSi, Translucent Modifier, 20g, TM-02
875890 GC Initial LiSi, Modeling Liquid, 50mL

877086 GC Initial LiSi, Basic Set

INCLUDES:

- GC Initial LiSi, Dentin, D-A1/DA-2/DA-3/DB-1/D-B2/D-C2, 20g
- GC Initial LiSi, Bleach Enamel, BL-E, 20g
- GC Initial LiSi, Enamel, E-57/E-58/E-59/E-60, 20g
- GC Initial LiSi, Translucent Modifier, TM-01/TM-05 20g
- GC Initial LiSi, Clear Fluorescence, CL-F, 20g
- GC Initial, AL, ZR, TI / Invivo-Insitu Glaze, GL, 10g
- GC Initial LiSi Translucent, TN/TO, 20g
- GC Initial, AL, ZR, TI / Invivo-Insitu, Glaze Liquid, 25mL
- GC Initial LiSi, Bleach Dentin, BLD-2, 20g
- GC Initial LiSi, Modeling Liquid, 50mL
- GC Initial LiSi Technical Manual
- GC Initial LiSi, Shade Chart

877087 GC Initial LiSi, Advanced Set

INCLUDES:

- GC Initial LiSi, Enamel Occlusal, EO-15 20g
- GC Initial LiSi, Fluo-Dentin, FD-91/FD-92/FD-93, 20g
- GC Initial LiSi, Enamel Opal, EOP-2/EOP-3/EOP-4, 20g
- GC Initial LiSi, Cervical Translucent, CT-22/CT-23/CT-24/CT-25, 20g
- GC Initial LiSi, Inside, IN-41/IN-42/IN-43/IN-44/IN-45/IN-46/IN-47/IN-48/IN-49/IN-50/IN-51, 20g
- GC Initial LiSi, Modeling Liquid, 50mL
- GC Initial LiSi, Shade Chart
